

# STAT 441 Project Statement of Contributions

Maisha Thasin, Joseph Wang (Group 25, undergraduate)

Winter 2023

## **Statement of Contributions**

Both Maisha and Joseph searched for and selected the dataset. Both members contributed to the initial investigation and dataset preprocessing, and participated in shaping the research question. Maisha performed the exploratory data analysis and trained the Support Vector Machine, Logistic Regression, and K-Nearest Neighbour classifiers. Joseph performed the discussion of similar analyses and trained the Decision Tree, Random Forest, and Neural Network classifiers. Both members contributed figures and tables to the report, and both members made significant revisions and additions to the report.
